Alumni,

This project started innocently enough but expanded beyond my capacity to make a complete listing of Benson obituaries. If there are gaps that you would like to see remedied, there is a tool that will enable you to look at many of the lapses in my list.

The tool is a database that can be accessed at no cost from the Multnomah County Library website, [www.multcolib.org](http://www.multcolib.org). Select “American Obituaries and Death Notices” under the “Databases” or “Research Tools” option. You then must supply your library card number and your password, which is the last four digits of your phone number on record at the library.

This database is easy to use. If you are looking for a specific person, enter their name and request the search. You can specify different regions of the county, and/or specific time frames. Not all newspapers are scanned within a given region so the search is not absolute. The time frame for each newspaper included is variable as well. For example, records from *The Oregonian* only go back to about 1986.

Most of the entries in my collection were obtained by specifying the year of death, and the words, “Benson, Portland, Oregon.” This search produces all the obituaries nationwide from the specified year that contain the specified words. So it is pretty simple, but no small task.
